

MONEY-MARKET AND CITY INTELLIGENCE.

SATURDAY EVENING.

The English funds opened steadily this morning, and soon experienced an advance of a eighth, which was well maintained to the close. Consols for money were first quoted 96½ to 97, and the final prices were 96½ to 97, and 96½ to 97 for the 7th of September. The influences which contributed to the increased firmness of the market consisted in the satisfactory appearance of all the foreign exchanges, which leads to the belief that such gold arrivals as may take place during the next month or two a considerable portion will be retained here; the temporary cessation of the decline on the Paris Bourse; the accounts of the harvest, especially from Ireland, where for the first time for 11 years there is promise of an entirely unfailing potato crop; and the late telegram from the East, indicating that the late successes of the Indian Army have effectually damped the rebellion, and that in China, where the fleets have obtained the command of the great canal, the Emperor is disposed to submit to a great concession. There is also a great scarcity of stock, and in the case of Reduced Three per Cent, the dealers are hardly able to meet any demand for immediate delivery. Bank Stock left off at 22½ to 22½; Reduced, 97½ to 97½; New Three per Cent, 97½ to 97½; India Stock, 217 to 220; India Bonds, 104 to 104½, and Exchequer Bills (March) 98 to 98½, June, 21½ to 24½, premium.

Foreign stocks have been inactive. Buenos Ayres left off at a decline, the market being affected by the statements by the recent mail of an excess of expenditure, which in dollars and cents, appears, although the fact is, that the figure in question represents only paper dollars, which are worth little more than 2d. sterling. Peru, Venezuela, and Turkish, especially the Four per Cent, were firm. Buenos Ayres Six per Cent, were negotiated at 97½ to 97½; Peru, 104½ to 104½; Mexico, 104½ to 104½; Brazil, 104½ to 104½; Half per Cent, for the account, 97½ to 97½; Portuguese, for the account, 97½ to 97½; Turkish Six per Cent, for the account, 97½ to 97½; ditto, Four per Cent, Guaranteed, for the account, 104½ to 104½; Venezuela, for the account, 104½ to 104½; and the Deferred Two per Cent, 16½ to 16½.

The final quotations of the French Three per Cent, on the Paris Bourse this evening were 68½, 55c, for money, and 68½, 55c, for the end of the month, showing a further fractional advance.

There are no operations at the Bank to-day of any importance.

The rates of exchange by the India and China telegram to-day are slightly less satisfactory as regards Calcutta, a rise having occurred of rather more than one per cent. At Shanghai there has been a further movement of one per cent, in our favour.

The Bombay steamer on the 10th will take out only 200, in specie. The Tamar on Monday will sail for Brazil, with 54,885, in gold and 18,260, in silver.

A prospectus has been issued of the Malta and Alexandria Telegraph Company, with a capital of 300,000, in 50 shares, to complete the Mediterranean portion of the line to India. A cable is proposed from Malta to Candia, whence lines will diverge respectively to Constantinople and Alexandria.

The waters of the Pacific between Panama, San Francisco, and British Columbia seem to present a better opening than could be found in any other Great Eastern steamship. A correspondent, however, points out a difficulty which he considers fatal. The fouling of iron vessels, he avers, is a serious evil, and with such rapidity as to render them in one or two voyages totally unserviceable. They become incrustated from stem to stern up to the water line with an oblong shellfish averaging about 2½ inches in length, which attacks themselves so firmly that removal of them can be effected only by the use of hammers and cold chisels. At intervals of three months at least every such vessel would require beaching, when the risk of straining would have to be encountered together with the heavy expense of manning and victualling the ship.

The obnoxious relation to the claim of Mr. Vincent Scully upon the life of John Sadler, on the life of John Sadler, which was technically vitiated by the suicide of that person. Mr. Scully held the policy for several years as security for a debt, and it appears to be the custom of most assurance offices to not to avail themselves of the suicide clause in the policy of this description; but at a ballot of the members of the London Life on Wednesday last it was resolved to reject his application. A minority of 82 members, however, expressed their opinion that the claim should be paid.

"Sir, Permit me to draw your attention to my claim, notwithstanding your article of the 22nd of July, in respect of a policy in the London Life Association, which was issued to me on the 10th of the late Mr. John Sadler, as my security for a debt. In a commercial community it is of extreme importance that all insurance companies should scrupulously respect the rights of bona fide creditors, and that they should not be vitiated by policies effected to secure honest debts."

"In my own case the result of the ballot taken yesterday has been the present position of my claim, which is 215 to 82 votes; but the circumstance that, notwithstanding the overwhelming influence suddenly used against me, so many independent members have voted in favour of my claim, gives me the strongest assurance that my claim is just, and that I am entitled to the full amount of the policy."

"I am, Sir, your obedient servant,"

"VINCENT SCULLY."

"Merrion-square, Dublin, Aug. 8, 1858."

The railway intelligence of the week comprises proceedings of several of the leading companies. In the report of the London and North-Western it is stated the balance of net revenue applicable for dividend for the past half-year is 450,740. The expenditure for the same period has been 454,104, of which 320,188 was for working stock, lands, and buildings, and the remainder for lines in which the company have an interest. The entire traffic receipts were 1,979,997, against 1,556,519, in the corresponding six months of 1857. The decrease was taken place in about equal proportions in goods and passengers, and the diminution in the actual profit is stated at 164,976. The working expenses show a saving of about 10,000. The falling off in the revenue is attributed—first, to the depression of trade; secondly, to the increase in May and June, 1857, having comprised an exceptional record; and, lastly, to the continued competition of the Great Northern and Sheffield companies. The loss from the last cause is estimated at 75,000. Hitherto forbearance has been shown by the London and North-Western in the hands of the Northern, but it is clear that such forbearance must have a limit. The large claims of money said to be due to the Manchester, Sheffield, and Lincolnshire are denied. The Bill sanctioned. A dividend is recommended at the rate of 3½ per cent, per annum, and the balance of the half-year as compared with the corresponding period of 1857 is 14,648, but the working expenses have also been 1,682, less. The falling off in revenue is attributed to the depression in trade. The expenditure on capital account has been 225,186, the principal item being 123,547, for the

Yeovil and Exeter Extension; 21,442, is likewise included for additional plant, and 2,718, for law costs. The Northern Junction line has been completed, which will effect a saving of about half an hour in the journey between London and Weymouth. The Bill for converting the Dover Canal into a railway line of railway will thus be formed for 24 miles between Southampton and Basingstoke, parallel to the company's main line. Care will be taken to prevent the success of any further aggression. The works on the Exeter Extension are proceeding satisfactorily. At a meeting of the Manchester, Buxton, and Midland Junction a dividend was declared of 1s. 4d. per share. A branch from Whaleybridge to Buxton has been authorized by Parliament, and on its completion there will be little left to accomplish, an extension to Manchester. The London and North-Western and Midland companies will expire in 13 years. The report of the Lancashire and Yorkshire states the half-year's receipts at 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825.

Notwithstanding the fact that the revenue of the Lancashire and Yorkshire for the half-year, 1857, was 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 532,918, against 581,743, in the corresponding period of 1857, showing a decrease of 48,825.

It appears that the public are disinclined to subscribe, and that the aid of the railway companies and wealthy individuals interested in the project is required. The report of the East Lancashire states the half-year's receipts for the past half-year at 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825.

The expenditure on capital has been 15,667, of which 12,000 was for extension of the Skelton branch to Raincliffe, and the balance for the public. The Amalgamation Bill with the Lancashire and Yorkshire will be again presented next session. At a meeting of the St. Andrew's and Quebec it appeared that the Bill promoted by them was not likely to be passed.

The directors of the London and Blackwall states that the receipts for the past half-year show a diminution of 542, only when compared with the same period of 1857. The receipts for the past half-year were 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825.

The directors of the London and Blackwall states that the receipts for the past half-year show a diminution of 542, only when compared with the same period of 1857. The receipts for the past half-year were 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825. The expenditure for the same period was 155,189, against 155,189, in the corresponding period of 1857, showing a decrease of 48,825.

At a meeting of the Westminster Palace Hotel Company it was announced that more than 7,000 shares having been subscribed, the undertaking will be proceeded with. The passing of the Bill for the London and North-Western will be in close proximity to the hotel, which will be in close proximity to the hotel.

The following letter from Mr. Montagu to the latest details of political and mercantile affairs in the River Plate is—

"The Chambers will continue to sit until the middle of the month, and the dispatch which they were unable to get through during the week, will be sent to the new Customs tariff, the particulars of which are unknown to the public, and the Brazilian tariff of commerce. The report of the Chambers will be in close proximity to the hotel, which will be in close proximity to the hotel."

a conditional arrangement for the redemption of the Customs administration. It is well known, however, that Sir James was against waiting the arrival of the sanction of Her Majesty's Government; he was for taking away the administration of the revenue, although it is held under an international contract. Business is duller than usual at this season of the year. Exchange, 40d.

"Buenos Ayres has not recovered from the effects of the late failures. There is a complete want of confidence. The interest of money has fallen as low as it was ever known, and the market is full of gold. There have been destructive floods in interior, and the Indians have been added to the distress. Sheep, which were selling at 65 to 70 paper dollars, can now be had at 25, and land has fallen nearly 50 per cent. The Government has applied to the Chambers for permission to make a further issue of 12,000,000 of paper dollars to meet extraordinary expenses. The most cheering intelligence is that the Government of Buenos Ayres is, at the best and most pure that the country has ever known. Paper dollars 37½ the double exchange.

"From the Argentine Confederation there is no news. Nothing further about the differential duties, although it is still stated that the Government will not allow a duty of 10 per cent on the importation of goods from the United States. The weather is very cold, but reasonable. The fever entirely disappeared from Buenos Ayres.

"Annexed is a communication embracing a narrative of the contest between the Dutch inhabitants of the Orange free republic adjoining the Cape Colony with the powerful tribe of the Basutis, in which Sir George Grey has been called to act as mediator.

"The events transpiring in this colony do not materially concern the great political questions of the day, yet they are such as may individually interest many of your readers here, and they are such as may be of some value in the doing of the great family composing the English nation.

"The colonists are much grieved and disappointed at Lord St. Albans having been so long in the country, and at the fact of his not having been able to secure the taking of a place of refuge at Table Bay; and, considering that this place is the world's port, likely to be visited by the ships of all nations, and that the demand for merchandise of every description, and its consequent increase of shipping by that civilization which must follow the settlement of the colony, it is not surprising that the colonists are so much grieved and disappointed at the fact of his not having been able to secure the taking of a place of refuge at Table Bay; and, considering that this place is the world's port, likely to be visited by the ships of all nations, and that the demand for merchandise of every description, and its consequent increase of shipping by that civilization which must follow the settlement of the colony, it is not surprising that the colonists are so much grieved and disappointed at the fact of his not having been able to secure the taking of a place of refuge at Table Bay; THE CORN TRADE.
CAMBRIDGE AUG. 7TH.—At this corn-mar-

[illegible][illegible]

OXFORD, 7th.—At this day's market there was a good attendance of buyers, and the business was brisk. The wheat was fairly well supplied with, was rather a large one, and included a great many samples of this year's growth, which came to market in excellent condition, but business transactions were by no means brisk. The best of the wheat was sold at 48s. to 50s. per quarter, and the bulk of the crop at 46s. to 48s. Barley was a dull sale, and ruled from 32s. to 36s. per quarter. There were several samples of new oats offering, one of which, weighed 48 lbs. per bushel, and sold at 24s. per quarter. The new corn was quoted at 48s. to 50s. One sample of new beans was shown for which the holder asked 62s. per cwt. It is almost impossible to get a correct estimate of the value of the crops from the reports from the neighbouring markets during the week; but, as the farmers were busy at harvest, very few reports were received. The prices of the various crops were mostly steady, and the yield is stated by good judges, to be full and average. Barley, oats, and peas are not so forward, and the crops of these are not so good. As regards the grass, there is every prospect, very few will be left in the fields. The grass fields, more particularly on the hills, are being dried up for want of rain, and unless we shortly have a good shower of rain, the grass will be very short.

PIETERBOROUGH. *Wheat.*—As this corn-market there was a limited attendance of farmers and a middling supply of wheat. Good winter medium, realising 25s. to 32s., and beans 4s. to 51s. per qr. Good breads of corn has this week been led in capital condition. The market has been less so than in the previous week, but the quality is to the quality; indeed, the better variety. Labour has been much in demand and high prices given. Some small quantities of rye and malted barley were also offered.

READING. *Wheat.*—This has been a week of uninterrupted brilliant weather, and these farmers who were able to command sufficient prices for their crops, have been enabled to do so. The market has required quickly to be put down, have secured the whole of the corn in first-rate order. It is many years since it was known that the corn was so good as it is at present, and the weather has been so excellent condition as it is this year. The steam threshing-machines have been extensively employed the last few days, many farmers being enabled to get in their crops in a comparatively short time, and to have some new samples. Although the present crop of wheat does not yield

GRAND RAPIDS, Wis.—This exchange last year amount in the aggregate to about 200,000 quarts, against 94,000 in the corresponding period of last year. The demand for this article is not so great as it was some years ago, and is now about the same as it was in 1905. The demand for this article is now about the same as it was in 1905. The demand for this article is now about the same as it was in 1905.

[illegible]

LINCOLN, 17.—At this corn-market yesterday there was a small attendance, and the market was quiet. The price of corn was a trifle higher at the quotation of last week, at which prices only a limited business was done. New samples of white-corn at 54c, and red, at 53c. Corn of the year before last, and for red, heavy harvest was quoted at 52c, 50c, per qr. for grinding. Oats and barley supply, and made the fullنعنتures of last week, the best samples yielding 36c per 24 lbs. Beans were a rather small supply, and of the year before last, and for red, heavy harvest, the best asked; superior samples made 61c, per 35 stone. There has been another glorious harvest week, and wheat ending and leading have been sold at 70c, per qr. The wheat crop is the most favourable to the yield of wheat, from some parts they are the most favourable district, while from others there are complaints of the crop being small. The wheat crop is the most favourable to the yield of wheat, from some parts they are the most favourable district, while from others there are complaints of the crop being small. Taken, however, altogether, the accounts are favourable, and the weather all that the most sanguine could desire. An unusually early and heavy rain has fallen, and the weather is of a most cheering and cheering character. The weather is of a most cheering and cheering character. The weather is of a most cheering and cheering character.

very disappointing, and not a few of the crops are generally well short. Oats are thin, and beans wretchedly deficient. Turnips would be greatly improved by rain, as would also the pasture. The corn is in a fair way of being well matured, and the Holfest wheat and oat cutting has been around this week, and a good yield is expected both as respects quantity and quality. 15th inst. The weather has been very much improved, and the crops are here. Potatoes are looking well. In the district of Aford leading is going on rapidly. The crops are prolific, but there is an opinion that they may be injured by the late frosts. The corn is now having been laid by the tempestuous weather a few weeks ago. Around Louth farmers are rapidly securing their crops. What is very interesting is that the corn in the neighbourhood of Barton a great breadth of corn has been cut this week in excellent condition; the yield was 40. Around Uxbridge wheat is doing very well, and the corn is in a fair way of being ripe. Beans and peas are indifferent. Turnips are languishing for lack of rain. There are no complaints as yet respecting frosts. Reports of frost in the north are not so trustworthy as those from the south, but upon the whole accounts are satisfactory.

Ayuntamiento de Madrid

STATE OF TRADE.

BIRMINGHAM *Time* *No.*

NOTTINGHAM, 7TH.—The demand for lace for the home market continues flat, and this has been the case for a considerable time. The demand for the export market is somewhat better for the autumn, however, are tolerably good. For export the demand is brisk, and some continental houses are busy. Plain goods are doing well, but fancy goods are not doing so well. Upon the whole workpeople are rather better employed. Silk remains firm, at late prices. Hosiery there is a demand for, but few buyers have been in the market. Manufacturers are for the most part busy with their orders previously on hand, and some are doing well. The glove branch is flat. The stocks on hand of all descriptions of hosiery goods are unusually light. Farms are firm, with an upward tendency and a demand for the autumn. It is somewhat more difficult to purchase than they have been for some time past.

WOLVERHAMPTON, 7TH.—In the beginning of the week, circulars were sent out by the leading ironmasters, proposing a reduction of 10s. per ton from the prices agreed upon at the last quarterly meeting, which makes bare 7s. 10s. and other kinds of iron in proportion. This proposal has been generally received, and a reduction some weeks ago, and adopted it in reference to their American customers, but others strongly opposed it. The small quantity of iron made in this country, and the iron which produce a fair quality of iron, but who do not feel bound by the prices fixed by the Ironmasters' Association, have been the cause of the small reduction. In consequence of this course, the announcement of the 10s. reduction by the houses dealing directly with America has been received with much disfavor. It is not probable that it will appear to have produced much effect as yet, but a few orders were sent over. Some makers speak of a rather further reduction, but this is not probable. The iron made for Prussia, North Germany, and the Baltic countries, is not on the whole the trade is very languid. It is worthy of

are likely to obtain, even by the interposition of the Court invoked on their behalf. The great iron-foundries of the neighbourhood, and the numerous smaller establishments of neighbouring towns, have all been ordered to suspend their orders here made their appearance, but these are not of any great extent, and will speedily be exhausted. The screw and bolt manufacturers are more generally employed, in a great number of the smaller towns, in the building establishments of the town and neighbourhood, and there are large orders in hand for the East India, the Ordnance, and the Navy. The great iron-foundry or Ordnance works are in course of execution, but they are limited in comparison with those received during the Crimean War. The great iron-foundry of Messrs. Fox and Henderson, commenced in 1854, and which occupies a large tract of ground in the country. The works, which stand upon five acres of ground, are arranged in a quadrangular form, and have a frontage of 1,000 feet. The works are situated on a high bank, overlooking a large wharf, and are connected with the wharf by a long and spacious quay, giving each a share of wharf frontage, and a distinct

[illegible]

The Board of Directors, after exhausting their stocks in the expectation of a reduction in the prices of metals, begin to replenish their shops and warehouses with the wares traded by the merchants of the district; have held several public meetings during the week. The directors of the Midlands, of which the late Mr. Goshall, M.P., was manager, are highly satisfactory. The profits amounted to 30,000*l.*, 14*s.* 6*d.* after paying income-tax and providing for every bad and doubtful debt, £9,000 and £10,000 respectively. The first half-year ending the 31st of December, and one to the same amount recommended for the past half-year, will absorb about £17,000 more than the last year's dividend, and leave the reserve making 117,244*l.* 10*s.* The directors recommended that the share capital should be increased from £100,000 to £150,000, and that the balance of £17,244*l.* 10*s.* be issued immediately and distributed in the ratio of one for every 10 shares held by each proprietor, the amount upon advance to be fully paid up by the shareholders at once, and the balance to be added to the reserve fund. The Board of Directors, having considered the presentation of the Rev. Gilson Irlister, incumbent of St. Peter's Church, Aberystwyth, as Minister of the Welsh Evangelical Association, and the Rev. J. H. Jones, of St. John's Church, Aberdeen, along with the sermons complained of and other documents produced, and having formerly allowed the respondent the fullest opportunity of stating his defence, thereby in presence of the assembled Synod of this diocese, and before the members of the said Synod, who were retained in the third branch of said presentment under head marked "A," however erroneous in other respects, do not amount to a denial of the charges against the respondent, and therefore, the special error controverted in the authority quoted in the first part of the corresponding head of the second branch of said presentment, is proved to exist, and the respondent in the last part thereof, and I therefore dismiss the complaint against the respondent under the foresaid head of the second branch of said presentment, and the charges therein contained, and the passages quoted under the head marked

proprietor of about 1400, per share, that being about the present selling price of the shares. The recommendations of the directors were to pay a dividend of 10s. per share and the Kidderminster Banking Company declared a surplus profit of 29,000*l.*, and a dividend of 10*s.* per share was declared. The directors recommended that the company should be recommended a further dividend to the same amount for the half-year ending the 30th of June, leaving a balance of 19,000*l.*

BRADFORD, 77*th*.—In English wool a steady business has been done in this market during the present week. Holders are very firm, and prices, particularly of good lustre and staple, are very firm. The market is well supplied with week's quotations. According to a report of the Doncaster annual wool fair, on Thursday last, it has been matter of surprise to find that the price of the staple of the best wools was lower than in the previous year, and considering the severe depression which prevailed in the article last winter, prices should not only have advanced considerably, but that so large a quantity of wool was forthcoming.

BRISTOL, 77*th*.—In the market for raw wool, it was fairly well supplied, and prices were not very low. The market was

B', sections a, b, c, is in direct contradiction to the doctrine founded on under consideration. The Synod assembled, as aforesaid, suspend the respondent, the Rev. Patrick Chyne, from his office of Presbyter of the Episcopal Church in the Diocese of Aberdeen, and from all the rights and duties of any of the functions belonging to that office, both in the Church of St John the Evangelist, Aberdeen, of which he is a member, and in the Church of St Andrew, Aberdeen, in process over which I exercise spiritual jurisdiction as a Bishop of the Episcopal Church, until such time as he has renounced the doctrine of the Resurrection of the dead, and the doctrine contained in each and all of the quotations in the third branch of the presentment marked 'B', sections a, b, c, and d, and until he has been restored to the

[illegible][illegible]

done, and a cheerful impetuosity been felt in the trade. The shipping houses have bought a good deal of union cloth, and the country has been supplied with a fair amount of the better qualities of broad cloths and trousseings. The home dealers, too, have purchased of all sorts of goods, and the country has been supplied with the inferior qualities, and various makes of checks are in request. Altogether, the staple trade of this town has been unusually brisk, and the merchants have confidently anticipated that it will continue in a prosperous condition for some time to come, and that it will present a more cheerful aspect than the present year, to which it has hitherto lasted year.

LEEDS, 7th. — There has been a very good market in the cloth-halls this morning, merchants buying a large amount of the best quality of broad cloths, and a considerable quantity of light goods for the present season and a large bulk of heavy goods for autumn and winter wear. This increased activity in the mercantile trade is deemed to have been expected, and reflects the warmness of the weather, but it is not

which a considerable quantity of cloth has been sold, a fair portion of which was made on behalf of contributions to the relief of the poor in the various unions and parishes for the relief of paupers in and out of the country. The value of the goods sold, and the hopes of cheap food and good trade, the commercial reports from our North American and Australian colonies tend in a similar direction. The fact that the Atlantic cable is at an important junction, by means of the Atlantic telegraph, of the Old World with the New—a junction which must not only increase the demand for the telegraphic apparatus of Brother Jonathan, but must also place those transactions very often on a sounder footing than they have hitherto been—these are all circumstances which are so necessary to point out there is a confident hope entertained that the staple manufacture of this locality will still further augment its production, and that the demand for it will be quoted with safety, either as to cloth or wools: to those are both stiff, and are more likely to advance than fall.

LEICESTER, 7th.—There is rather more doing this week in the clothing trade, and the demand is decidedly better demand, this department having gradually

expended in the half-year ended Lady-day last, in 64 unions and parishes for the relief of paupers in and out of the country, £10,000, and in the same period £17,626, 36s. For Irremovable paupers 452,914, was spent in 61 unions and single parishes. The cost of relief to the poor in the same period was £10,000, and the amount paid to the other paupers, the proportion having risen 2.4 per cent. The number of paupers in receipt of relief on the 1st of January 1850 was 10,000, and the number of able-bodied paupers, 105,770.

[Advertisement.—] Glegg's School Series, intended to contain the whole of the English Language, from the first to the last year of the English School, is now published by Messrs G. & J. Glegg, 26, Abchurch-lane, London. not steadily improved for some weeks. The fancy branch, however, has been somewhat better, and the market has been more active for some time. There is no noticeable alteration in the prices of the hosiery trade in the country districts, but many of the manufacturers hereabouts have been able to obtain a better price for their wares than there was a fortnight ago. There is a tolerable trade doing at late seasons. Worsted yarns are in request at full prices.

MANCHESTER, 7th.—We have not had much business this morning, but the market is somewhat better than it was yesterday morning of Tuesday. There are many old mills and much old machinery remaining unemployed since the panic, and that cannot come into requisition again, so long as the new or improved machinery is not introduced into the race in the race of competition, by the improved means which science and capital have introduced into more modern factories. The market for the new machinery is not so brisk as it was some time ago, but still there is a perceptible improvement in trade, and a large business has been effected during the 'new lull' in both yarn and hosiery. The cloth trade is not so brisk as it was some time ago, but still there is a perceptible improvement in trade, and a large business has been effected during the 'new lull' in both yarn and hosiery. The cloth trade is not so brisk as it was some time ago, but still there is a perceptible improvement in trade, and a large business has been effected during the 'new lull' in both yarn and hosiery.

long cloths. In printers the lower qualities meet with the best demand. Shirtings of now a quality have gone off well, and trade 40-inch cloths, as well as 35-inch widths command fair attention. In water twist warps and bundle

train received information of the assault upon the complainant, and on questioning the prisoner he found he was travelling in the first-class carriage, and was carrying 100 persons. They were in the centre of the train and about two or three carriages from where the prisoner had been seated. He stated that he occupied in travelling from Blackheath to Lewisham is four hours.

Mr. TRAILL severely commented on the conduct of the driver, and referred to the circumstance of his holding a ticket for meeting a third-class carriage; and although it had appeared that the driver was not in the carriage had exclaimed that the statement of the ring woman was "all book," it must not be supposed that these were the only persons who were not much frightened. It was, therefore, necessary for the protection of the public, to permit of that sex that she should make an ample.

On the 14th AGENTATE then sentenced the prisoner to imprisonment on one calendar month.

Advertisement. 1.—"Preachers and Preaching," by the Rev. H. Christmas, M.A., P.R.S., contains the Best and Briefest Preaching—Ministerial Qualifications—Preaching from Early Times to the Present—Extensiveness—Preaching—Historical and Literary Survey—Preaching—Preaching—Preaching—Preaching—Preaching—Texts—Etc. This little work is full of pertinent and suggestive remarks, and is well adapted for the use of students on a calendar month.
